

# Ujima Suites SeniorsNow Ujima Consultants, 2003

## A SENIOR SERVICE MANAGEMENT SYSTEM

This application helps agencies and facilities to track, record and manage senior client care and family support information tracking. **SeniorsNow** tracks adult client attributes and statistics factors and provides reports and graphs regarding service frequency. The **SeniorsNow** application is used to provide client assessment for assisted care facilities, home-care service reports and client contract agreement. The application allows multiple client activity with easy category editing. Client service needs, concerns and long-term issues can be maintained.

### In-Take Screen Tabs

The client entry screen changes to allow for tabs that provide faster access for user. The Intake screen tabs allow for **SeniorsNow** to have several quick client usage reports and can issue a standard agreement contract. There is also a tab to record service type requirements and service cost. This Intake screen also allows the agency to make a click count of the services received by the client.

### Senior Care Grouping

The application allows the user agency to maintain quality information on service care group activities and care usage. All **seniors** in a particular care group or activity can be treated as a group for recording service activities. Staff tasks can be recorded against activities for billing purposes such as energy credit allotments, or exercise classes.

### Prescription Services Tracking

The **Prescription Services** Module is used to collect, track and edit data into reports for facilities or providers that serve on-site **Prescription and medical requirements** to senior clients. The application has client setup for special **prescription**, along with **prescription** type estimating and delivery tracking. **Prescription** tracking can be by morning, midday, evening and night. Medical items can be setup to estimate AMA daily requirements or use some other standard.

### Administration and Reports

Staff tasks can be recorded against activities for billing purposes. System Administrator can make global category changes and control user access at different levels. Access for printing can be limited and various client-warning notices can be set. Staff job reports can be compiled for management. This application offers multiple users reporting and executive graphs. Application can be accessed over a network or from a remote site. The database functionality is compatible with NetMeeting capabilities.

### UjimaSuites Version Integration

**SeniorsNow** application integrates with other **UjimaSuites** packages such as the **Case Management** application for registering clients and taking history and medical backgrounds. The application can also be used with the **ShelterMe** database for documenting necessary interim housing care.

### UjimaSuites Support

The **FORUM** member agencies and professional practitioners have reviewed the **SeniorsNow** revised application. They help to provide some of the distribution task requirements and sample data. The sample data is based on specific evaluation usage of the application as an internal client interview questionnaire and ongoing tracking needs. All names have been changed to protect client confidentiality.

**SeniorsNow** is a **Ujima Consultants** copyright application available as a CD release. **SeniorsNow** is recommended for organizations that need to track client personal care service activities for multiple guardians and funding sources. **SeniorsNow** can be used for agencies with long-term adult or community centers, seniors home-care service providers and last-term care facilities.
